

## Performance Mechanical Group Is Recognized in Puget Sound Energy's 2014 Energy Efficiency Leader Awards

*This achievement is for recognition of 25 completed energy efficiency projects with Puget Sound Energy.*

Kent, Wash. July 30, 2015 – Performance Mechanical Group is honored to be selected by Puget Sound Energy as a Commercial HVAC energy efficiency leader in its 2014 Energy Efficiency Leader Awards. Performance Mechanical Group successfully delivered 25 energy efficiency projects to Puget Sound Energy in 2014. As a Contractor Alliance Network member, Performance Mechanical Group helps its commercial customers achieve energy efficiency and facilitates Puget Sound Energy rebates and incentives for qualified projects.

Kenny Miller, General Manager, Performance Mechanical Group, comments; “To be selected by Puget Sound Energy as an energy efficiency leader in the Commercial HVAC category in its 2014 Energy Efficiency Leader Award further validates our commitment to providing Puget Sound customers with energy efficient products and services. As a member of Puget Sound Energy’s Contractor Alliance Network we continue to help our customers receive utility rebates and incentives for their energy efficiency efforts. With 25 completed projects in 2014, the highest number in our category, our goal is to exceed this achievement by helping even more customers take advantage of Puget Sound Energy rebate programs in 2015.

Performance Mechanical Group was notified of this achievement through Puget Sound Energy’s press release announcing the recipients of its 2014 Energy Efficiency Leader Awards. Read Puget Sound Energy’s official Press Release [here](#).

“We are pleased to recognize Performance Mechanical Group for its commitment to helping commercial customers make safe, dependable and efficient energy choices for their businesses while lowering their energy bills,” said Bob Stolarski, director of PSE’s Energy Efficiency department.
